GURUVENU KAMANURU

Mainframe Developer

guruvenu.k152@gmail.com https://www.linkedin.com/in/guruvenu-kamanuru/ Wolfsburg, Germany +49 17623973753

Mainframe Developer and IT Professional with 5+ years of experience across retail and healthcare environments. Experienced in COBOL, JCL, DB2, CICS, VSAM, batch processing, production support, troubleshooting and automation. Focused on reliable enterprise applications and efficient incident resolution.

Professional Experience

IT Support & Infrastructure Technician

Freelance

Oct 2024 — Present Wolfsburg, Germany

- Assembled, configured, and maintained desktop PCs and personal computer systems.
- Installed and configured operating systems, drivers, software, and essential system utilities.
- Diagnosed hardware faults and replaced defective components, including RAM, SSDs, HDDs, power supplies, and cooling components.
- Set up personal cloud storage and self-hosted services for secure file access, synchronization, and data backup.
- Integrated Raspberry Pi devices into home lab environments for lightweight server applications, automation, and network services.
- Configured local networks, shared storage, remote access, and basic network troubleshooting.
- Performed system upgrades, preventive maintenance, performance checks, and hardware compatibility testing.
- Applied basic security practices, including software updates, access controls, backup management, and secure system configuration.

Senior Developer

GalaxE.Solutions

Nov 2022 — Jul 2024 Hyderabad, India

- Designed and delivered 25+ COBOL/JCL/DB2/VSAM batch programs automating healthcare data workflows, cutting manual intervention by 40% and sustaining a 99% batch job success rate across peak processing periods.
- Administered and tuned CA7 Scheduler jobs for complex batch dependency chains; ensured SLA adherence across daily, weekly, and month-end batch cycles.
- Integrated mainframe batch output with ELK Stack (Elasticsearch/Kibana), building real-time log-analysis dashboards processing 2M+ daily events — reducing incident detection from hours to minutes.
- Managed end-to-end Connect:Direct (NDM) and MFT/FTP/SFTP file transfers for HIPAA-compliant EDI transactions across 10+ external partner organisations.
- Worked within RACF-controlled environments; supported access provisioning, dataset security reviews, and compliance audit preparation.
- Provided L2/L3 production support — diagnosed and resolved JCL ABEND/S0C7/S0C4 issues under SLA windows, authoring UATR and RTCR reports for regulatory submissions.
- Coordinated across development, QA, and business teams in Agile sprints; executed full regression cycles and UAT sign-off for all major releases.

Career Objective

Seeking a Mainframe Developer position where I can contribute my experience in enterprise application development, batch processing, production support and troubleshooting while continuing to develop my technical skills.

Technical Expertise

COBOL	▬▬▬▬▬
JCL	▬▬▬▬▬
DB2 / SQL	▬▬▬▬
CICS	▬▬▬▬
VSAM	▬▬▬▬

Languages

Telugu	Native
Hindi	Native
English	**Profecient**
German	**A2-B1**

Additional Skills

- IBM z/OS, CICS Transaction Server, TSO/ISPF, SDSF, JES2, z/OSMF
- RACF, HIPAA-compliant data handling, audit reporting
- IMS DB, DB2 (z/OS), IMS DB, VSAM (KSDS, ESDS, RRDS)
- Connect:Direct (NDM), MFT, FTP/SFTP, AWS S3 integration
- PROCLIB and JCL Utilities
- Endevor, Git, Jenkins, Docker, Python, Bash, Linux/Unix
- Batch Monitoring
- Production Support
- Incident Management
- Performance Tuning
- Automation and Reporting

Tools

- JIRA

Associate

Cognizant Technology Solutions

May 2019 — Nov 2022 | Chennai, India

- Developed 20+ COBOL/JCL programs using DB2 and IMS DB for Ford's retail data platform, reusing 70% of existing components to accelerate delivery by 30%.
- Designed and optimised DB2 SQL queries and IMS DL/I call sequences to improve batch throughput for high-volume transaction processing.
- Migrated and extended IMS DC online transactions to handle increased volumes; applied DL/I call optimisation techniques to measurably improve response times.
- Led JAD sessions with business analysts to capture requirements; authored Technical Specification Documents (TSDs) for all major enhancements.
- Delivered 5+ major releases with zero post-deployment defects through detailed test planning, XPEDITER-assisted debugging, and full regression cycles.
- Managed Endevor SCM workflows — code promotion, change packages, and release coordination across Dev, QA, and Production environments.

Desktop Support Engineer

Net-connect Global

Oct 2016 — Jul 2017 | Bangalore, India

- Supported mainframe application development and maintenance.
- Worked with batch processing, troubleshooting and application support.
- Replace these bullets with your actual responsibilities and achievements.

Trainee Engineer

TLE Technologies

Sep 2015 — Sep 2016 | Bangalore, India

- Managed network, IP, and remote access infrastructure for 100+ end users in a regulated banking environment; maintained 95% SLA adherence on ITSM tickets.

Key Responsibilities

- COBOL application development and maintenance.
- JCL batch processing and job troubleshooting.
- DB2 SQL data processing and application support.
- Production incident investigation and resolution.
- Application testing, automation and reporting.
- ServiceNow
- TSO/ISPF
- Mainframe Development Utilities

Methodology

- Software Development Life Cycle
- Regression Testing
- Root Cause Analysis
- Change and Release Management
- SDLC, Agile/Scrum, JAD sessions, UAT, Production L2/L3 Support

Certifications & Achievements

Cyber Security Training - State sponsored

"Hands-on security tooling, threat analysis, and vulnerability assessment.""

IT/Software Engineering Diploma, 42 Wolfsburg

"Common Core: C, C++98, Unix/Linux systems, Docker (multi-container Inception project), algorithms and data structures, networking fundamentals.""

Education

Master of Technology

Jawaharlal Nehru Technological University

Machine Design

2017 — 2020

Ananthapuram,India

Bachelor of Technology

Jawaharlal Nehru Technological University

Aeronautical Engineering

2011 — 2015

Hyderabad,India
