Guruvenu Kamanuru

Mainframe Developer| Cobol Developer | Cybersecurity Analyst | Soc Analyst | Jr Malware Analyst

Wolfsburg, Lower Saxony, Germany

Summary

Mainframe Developer | Business Analyst | QA Specialist | Transitioning to Cybersecurity

I’m an IT professional with over 5 years of experience in business analysis, design, development, testing, and production support on the IBM Mainframe platform. Throughout my career, I’ve worked across the entire SDLC, turning complex requirements into reliable, high-performing solutions that keep systems running smoothly.

I’m skilled in tools and technologies like COBOL, JCL, DB2, IMS DB, VSAM, SPUFI, FileAid, Endevor, Ctrl-M, SQL, JIRA, Rally, Power BI, and more. My experience spans everything from defect analysis and regression testing to data integrity management and Agile delivery — always with a focus on quality and efficiency.

My Path Toward Cybersecurity
Over time, my interest has shifted toward the security and resilience of the systems I help build and maintain. Working in production support exposed me to the importance of data protection, access control, and incident management, and sparked my passion for cybersecurity.

I’m now building my skills in this area through hands-on labs and certifications like CompTIA Security+ , with a goal to transition into a security-focused role. I want to combine my mainframe and QA background with modern security practices — helping organizations protect their systems, data, and people in an ever-changing digital world.

Experience

GalaxE.Solutions
Senior Developer

November 2022 - July 2024 (1 year 9 months)
Hyderabad, Telangana, India

Senior Developer | US Healthcare Project – Polar Eligibility

Delivered automation and optimization solutions for processing Medicaid, Medicare, and Commercial client data, including secure transmission and report generation.

Key Highlights:

Developed an automated data switch system to streamline data transmission and reporting.
Built and maintained batch programs using COBOL, JCL, DB2, and VSAM.
Ensured quality through unit testing, QA validation, and UAT support.
Provided production support, resolving issues and monitoring batch cycles to ensure timely completion.
Managed data transmissions via MFT, FTP/SFTP, and AWS servers.
Oversaw code versioning and deployment using Endevor and Jenkins.
Conducted process analysis, enhancements, and adhoc request fulfillment to meet client requirements.

Endevor | Jenkins | QA Testing | Data Automation | Production Support

Cognizant
Associate
May 2019 - November 2022 (3 years 7 months)
Chennai, Tamil Nadu, India

Associate Developer | Retail Import-Export Project

Worked on a support and upgrade project managing transactions between importers and exporters. The project involved multiple application frameworks handling inbound and outbound data feeds, with secure exchanges via SFTP across various business markets. I was responsible for end-to-end functionality, maintenance, and enhancements of key applications supporting the export ordering and distribution system. Our applications processed orders both in bulk (batch) and online, managing the full flow from order receipt to invoice and ASN generation. For new importers or exporters, I analyzed integration possibilities and designed new workflows as needed, including CIF file mapping (CIF850, CIF810, CIF856).

Key Contributions:

Collaborated with business and technical teams to gather requirements and clarify functional specifications.
Conducted Joint Application Development (JAD) sessions to review and refine business documents.
Prepared Technical Specification Documents (TSD) and detailed design for batch program enhancements, reusing existing modules wherever possible.
Developed batch programs using COBOL, DB2, JCL, and IMSDB, and debugged systems using IBM Debug tools.
Created test plans for unit testing and QA validation, ensuring smooth deployment.
Performed impact analysis for requirement changes, identifying affected programs and ensuring consistent implementation.

IMSDB | Batch Processing | CIF File Mapping | Data Integration | QA Testing | SFTP

NetConnectGlobal
Desktop Support Engineer
October 2016 - July 2017 (10 months)
Bengaluru, Karnataka, India

Network Administration – IP handling, remote access allocations, connectivity troubleshooting (hardware & software)
System Support & Maintenance – diagnosing and resolving production issues to ensure uptime and stability
Asset & Inventory Management – maintaining IT inventories and hardware life cycles
Data Sanitization & Security – secure data wiping, device disposal, and destruction procedures

TLE Technologies
Trainee Engineer
September 2015 - September 2016 (1 year 1 month)
Bengaluru, Karnataka, India

Asset Management – Efficient tracking and lifecycle management of IT assets
Booting & Troubleshooting – Quick diagnosis and resolution of hardware/ software issues

Data Destruction – Secure data erasure and compliance with industry standards
Hardware & Software Installations – Setup, configuration, and maintenance of systems

Education

JNTU Anantapur
Master of Technology - MTech, Mechanical Engineering · (August 2017 - August 2019)

Malla Reddy College of Engineering & Technology
Bachelor of Technology - BTech, Aeronautical/Aerospace Engineering Technology/Technician · (August 2011 - August 2015)

Ironhack
Bootcamp Cybersecurity, Cybersecurity & Network Security Specialist | Digital Forensics | Threat Intelligence · (April 2025 - October 2025)

42 Wolfsburg
Diploma of Education, Computer Science · (September 2024 - February 2026)
