Subject: Application for Informatiker_in Systemintegration / E-Mail-Administrator (m/w/d)

I am writing to express my interest in IT roles within **Informatiker_in Systemintegration / E-Mail-Administrator** at HZI. With over **5 years of experience** in **COBOL, JCL, DB2, CICS** / **2 years** in **IT Support** and a recent **Cybersecurity Bootcamp**, I bring a unique combination of expertise in **mainframe systems**, **security practices**, and **IT operations**.

In my previous role at **Galaxe Solutions**, I automated critical data transmission processes, reducing manual effort by 40%, developed and maintained 15+ batch programs, and ensured 99% batch cycle completion through effective production support. Additionally, my exposure to **network security, ethical hacking, and vulnerability assessment** equips me to contribute to security-focused projects, SOC operations, and IT risk management initiatives. **COMPTIA Security+** certification is under progress.

I am particularly skilled in **analyzing business requirements**, creating automated solutions, and providing operational support — all while ensuring compliance with organizational and regulatory standards. I am confident that my **technical versatility, problem-solving skills, and proactive approach** can deliver value.

I would welcome the opportunity to discuss how my experience and skills align with your team's needs. Thank you for considering my application. I look forward to contributing to your organization's success.

Sincerely,
Guruvenu Kamanuru
