Mainframe Developer | COBOL, JCL, DB2 & CICS

Wolfsburg, Germany

SUMMARY

Mainframe Developer and IT Professional with 5+ years of experience across retail and healthcare environments. Experienced in COBOL, JCL, DB2, CICS, VSAM, batch processing, production support, troubleshooting and automation. Focused on reliable enterprise applications and efficient incident resolution.

CAREER OBJECTIVE

Seeking a Mainframe Developer position where I can contribute my experience in enterprise application development, batch processing, production support and troubleshooting while continuing to develop my technical skills.

EXPERIENCE

Galaxe Solutions, Senior Test Engineer
Nov 2022 – Jul 2024
Automotive Project
Automotive Testing and Log Processing

- Performed ECU, sensor and OBD-related testing in an automotive environment.
- Executed regression testing for Bluetooth, navigation and media functionality.
- Worked with application logs and log-processing workflows involving COBOL and JCL outputs and structured JSON data.
- Used JIRA and ServiceNow for issue tracking and incident management.

REPLACE WITH ACTUAL EMPLOYER, Mainframe Developer
REPLACE – REPLACE
Retail Domain
Retail Applications

- Developed and maintained COBOL programs for enterprise applications.
- Created and supported JCL batch jobs and investigated job failures.
- Worked with DB2, SQL and production support activities.
- Replace these bullets with your actual responsibilities and achievements.
